

# ERPC SFY 2022 Annual Listing of Federally Obligated Projects

## September 2022

Document completed pursuant to 23 U.S.C. Section 409. The preparation of this document was financed in part by the Ohio Department of Transportation (ODOT) and the Federal Highway Administration (FHWA), in cooperation with local units of government. The contents do not necessarily reflect the official view and policies of the State and/or United States (US) Department of Transportation. This report does not constitute a standard specification or regulation.

## **Introduction**

As required by the Bipartisan Infrastructure Law or “BIL”, Metropolitan Planning Organizations (MPO) are required to publish an annual listing of projects for which funds have been obligated in the preceding year that includes a listing of pedestrian and bicycle projects. From the Federal Code of Regulations Title 23 › Chapter I › Subchapter E › Part 450 › Subpart C › Section 450.334: Annual listing of obligated projects.

(a) In metropolitan planning areas, on an annual basis, no later than 90 calendar days following the end of the program year, the State, public transportation operator(s), and the MPO shall cooperatively develop a listing of projects (including investments in pedestrian walkways and bicycle transportation facilities) for which funds under 23 U.S.C. or 49 U.S.C. Chapter 53 were obligated in the preceding program year.

(b) The listing shall be prepared in accordance with §450.314(a) and shall include all federally funded projects authorized or revised to increase obligations in the preceding program year, and shall at a minimum include the TIP information under §450.326(g)(1) and (4) and identify, for each project, the amount of Federal funds requested in the TIP, the Federal funding that was obligated during the preceding year, and the Federal funding remaining and available for subsequent years.

(c) The listing shall be published or otherwise made available in accordance with the MPO's public participation criteria for the TIP.

This report responds to the directive and lists all transportation projects in the Erie County Metropolitan Planning Organization's region (ERPC MPO) that were obligated during State Fiscal year (SFY) 2022 (July 1, 2021 - June 30, 2022). To be included in this listing, an obligated project must be either entirely or partially located within ERPC's transportation planning area. The obligated amounts shown in the report are attributable to entire projects, including those portions located outside of the planning area. The planning area is composed of Erie County and the City of Vermilion.

FHWA defines obligation as: Obligated - Within this context, an obligation is the Federal government's legal commitment to pay the Federal share of a project's cost. An obligated project is one that has been authorized by the Federal agency and funds have been obligated. Projects for which funds have been obligated are not necessarily initiated or completed in the program year, and the amount of the obligation will not necessarily equal the total cost of the project. For FTA projects, obligation occurs when the FTA grant is awarded. For FHWA projects, obligation occurs when a project agreement is executed and the State/grantee requests that the funds be obligated.

ERPC traced the funding and implementation of surface transportation projects and programs in the past and reported the progress of projects in the Transportation Improvement Program (TIP). This report is intended to meet the requirements of the BIL as noted above.

Below are some definitions that may be useful when reviewing this report:

National Highway Performance Program (NHPP) – funding to support the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State’s asset management plan for the NHS.

Bridge Preservation, Replacement, Rehabilitation Funds-can fund the preservation, replacement, rehabilitation, and widening of any public bridge.

Highway Safety Improvement Program (HSIP)-consists of set aside from the Surface Transportation Program which funds projects that reduce traffic fatalities and injuries on all public roads.

Highway Infrastructure –Rail (Z906) -funds used for installation of protective devices at rail-highway crossings.

PID- Project Identification Number as listed by the Ohio Department of Transportation.

Safe Routes to School Program (SRTS)-funds projects that substantially improve the ability of primary and middle school students to walk and bicycle to school safely.

Surface Transportation Block Grant Program (STBG) - a flexible funding category used by States and localities for projects to preserve and improve the conditions and performance on any Federal-aid highway, bridge, and tunnel projects on any public road, pedestrian and bicycle infrastructure, and transit capital projects, including intercity bus terminals.

Transportation Alternative Program (TA)-a funding category that replaces the Transportation Enhancement funding category, funds can be used for non-motorized transportation improvements.

## **ERPC MPO Background**

The ERPC MPO was designated in 2003 after the 2000 census. The FAST Act requires those urbanized areas with a population greater than 50,000 develop an MPO as a condition for spending federal highway or transit funds. The ERPC MPO region includes all of Erie County and the Lorain County portion of the City of Vermilion. The MPO promotes a regional perspective towards transportation planning and has the responsibility for planning, programming, and coordinating federal investments. The ERPC MPO process creates a partnership among state, local government, and transit operators in providing transportation improvements. In the 2010 Census the Sandusky urbanized area fell beneath the 50,000 population threshold, however ERPC continues to be an MPO through support from local sponsors and the state.

ERPC coordinates planning efforts with the Ohio Department of Transportation (ODOT), the Sandusky Transit System (STS), and Federal Highway Administration (FHWA). The MPO Policy Committee is the decision-making committee of the MPO. The committee develops its positions by working with elected officials, staff from local governments and the above agencies, and the public through a committee system where various issues are presented, discussed, and recommendations are made. Current committees include the Technical Advisory Committee, Safety Committee, Citizens Advisory Committee and the Bicycle and

Pedestrian Advisory Committee. Special subcommittees and working groups are created and appointed, as need dictates.

### **ERPC MPO Long Range Transportation Plan**

The ERPC MPO Long Range Transportation Plan is a 25-year plan that was approved in July 2020. The plan includes needed transportation improvements and fiscal analysis for constraint to show that the transportation system improvements can be achieved over a 25-year timeframe. Federal law requires the fiscally constrained plan be updated at least every 5 years. Before projects can be approved for Transportation Improvement Program (TIP) funding, they must show compatibility to the Long Range Plan. The current plan passed has a horizon year of 2045.

### **Transportation Improvement Program**

The TIP is the adopted list of public transit, highway, pedestrian, and bicycle projects that will receive federal transportation funds in the near future. The TIP also includes projects in the ERPC MPO region that will only use state funds as well. The TIP implements fiscal constraint as well and the federal rules require that the TIP cover at least four years and be updated every four years. Under ODOT requirements, TIPs are required to be updated every two years and cover a four-year time frame. The TIP is amended quarterly to include any projects approved by the Policy Committee since original date of adoption. The complete ERPC MPO TIP is available for review at:

<https://www.eriecounty.oh.gov/TransportationImprovementProgramTIP.aspx> or by contacting the ERPC MPO staff at the Erie County Department of Regional Planning.

### **Public Involvement**

The ERPC MPO and MPO staff aim to proactively engage the public in the regional transportation planning process and embrace federal requirements that MPOs provide the public with complete information, timely public notice, full public access to key decisions, and early and continuing involvement in developing the TIP, Long Range Plan, and other products. ERPC's public involvement policy was updated in 2019 and is available on the website. However beginning in March of 2020, due to the COVID pandemic and restrictions on public gatherings, ERPC adjusted its public involvement to an online format. In the online format, the ERPC MPO public involvement strategies remain the same and include presenting information and educating the public, soliciting public input, requesting comment from the various ERPC MPO committees, and considering and responding to any public concerns. As COVID restrictions have lessened, ERPC returned to its normal public meeting format but also kept the online format as an available option for participants. A hybrid meeting approach has proven to be successful as ERPC has seen an increase in the number of attendees at its meetings. For this Annual Listing of Obligated funds report, a public notice has been published in the local paper (Sandusky Register) and made available for public review and comment (copy of public notice and any received comments included at end of this document). The report has also been posted on ERPC's website.

### **Summary of Projects**

ERPC currently has projects scheduled out until SFY 2026. Similar to the TIP, all SFY 2022 obligated projects are listed in chart form on the following pages. The chart lists all the projects for which

transactions involving federal funds were completed during SFY 2022. The chart lists the Project Identification Number (PID), project name, primary work category, federal funding category, total SFY 2022 obligated funds, total project amount requested, and total amount of remaining funds.

ERPC SFY 2022 DRAFT ANNUAL LISTING OF FEDERALLY OBLIGATED  
PROJECTS ERIE COUNTY, OH

The Erie Regional Planning Commission (ERPC) has completed a draft version State Fiscal Year 2022 Annual Listing of Obligated Projects. The Annual Listing shows all annual federally obligated transportation projects scheduled through the Metropolitan Planning Organization. The draft can be reviewed at the ERPC 3<sup>rd</sup> Floor Offices, Erie County Services Center, 2900 Columbus Ave., Sandusky, OH or online at <https://www.eriecounty.oh.gov/MPO.aspx> . Comments will be accepted until September 20, 2022 in person, by mail, phone (419.627.7652), e-mail ([planning@eriecounty.oh.gov](mailto:planning@eriecounty.oh.gov)) or by fax (419.627.7692). The success of any transportation report is reliant upon a strong public involvement program. ERPC has committed itself to pursue a pro-active public outreach effort.
