

RULE 28 - FIRE HYDRANT FLOW TESTING

Section 1. Any person, firm or corporation may request flow testing of fire hydrants for the purposes of determining available volume and pressure at certain points within the Water Distribution System. Requests must be made in writing to the Water Division Superintendent and should state the area where testing is desired and the intended purposes for such testing.

Section 2. All such flow testing and operation of fire hydrants shall be performed by authorized County employees. A service charge of \$30.00 for each hydrant flow test shall be paid to the County by the party requesting the flow test prior to such testing before being performed.
